Cambium Privacy Fencing

When privacy is paramount, Cambium for the solution. Beautifully designed fencing enhances your outside property, whether for relaxing or entertaining, or to increase the security of your children's play area. Both sides of Cambium fencing have the same attractive finish and design... allowing both you and your neighbors to appreciate its pleasing appearance.

Cambium privacy panels are assembled with traditional tongue-and-groove pickets. Each picket fits snugly into the next with no gaps between the boards, giving you true privacy.

The decorative rail adds stability, durability and attractive visual detail. Additional strength comes from the aluminum reinforcement in the bottom rail, while our rail lock system keeps the rails secure in the posts.

Cambium Picket Fencing

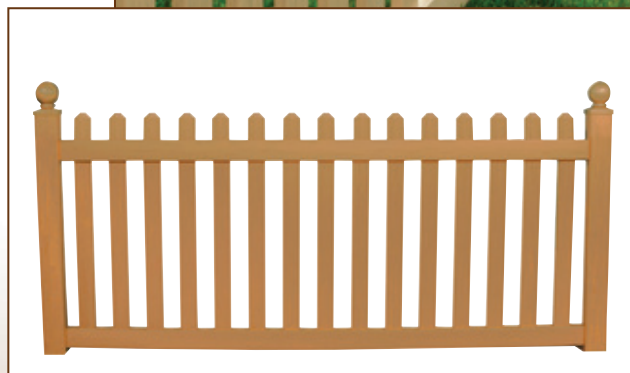

Cambium's picket fencing is an ideal way to establish attractive borders around your property. Whether in the back yard or front, it maintains that open feeling while still providing security for children and pets.

Vinylworks Construction Design:

- Cross rails that securely cradle every picket for strength and permanence
- Reinforced channels on all bottom rails for added durability and security
- Through-the-rail assembly, resulting in fencing that looks identical on both sides

Why Cambium Is Right For You

You can count on total peace of mind with Cambium fencing products. Our transferable limited lifetime warranty – designed to protect your investment – covers your fence against peeling, flaking, blistering, corroding, rotting, rusting and termite infestation.

Cambium products meet or exceed all relevant ASTM standards which govern our fence quality and manufacturing. You can be confident that we offer a superbly engineered fencing system and that the materials used in the manufacturing process have undergone extensive testing.

Cambium is the premium alternative to wood fencing, giving you the look of traditional wood with none of the work. The natural-looking wood grain and texture of Cambium enhance the appearance and value of your property by providing lasting beauty without the work of real wood.

With Cambium, you get the look of wood but never need to worry that your fence will split, splinter, rot or become termite infested... and best of all, you will never have to paint or stain your Cambium fence.

You can see the way Cambium resembles the texture and grain of real wood. Whether you choose privacy, or picket, you will be the envy of your neighbors.
